

On the same day and at the same time as the Mothers and Others Walk for Clean Energy there will be a

Students March for Clean Energy – May 15th 11:00AM Pershing Park to Veterans Park

March to the 350 Picture Site for the Noon Picture

Students are invited to join us at Pershing Park (just East of the Sage Library) to march down Midland Street to John F. Kennedy Drive and south to the site of the 350 Picture. Students in the march agree with the Support Statement of the Mothers and Others Clean Energy Walk. There will be ten minutes of marching instructions and a welcome before leaving for the march to Veterans Park.

350 Spring Festival Picture

Noon in Veterans Memorial Park

Stopping the burning of fossil fuels is the most important environmental goal we can have – and it gets little real consideration in the halls of Congress. Grassroots action is needed to build a large movement to support major conservation, wind, solar and geothermal energy initiatives. By stopping the subsidies for coal and oil we make a great start, so that money can be made available to develop and deploy renewable energy sources and to make energy conservation a major priority.

On the day before Mothers Day we will gather at Noon, after the Mothers and Others Walk for Clean Energy, and after the Students March for Clean Energy, for a picture of all those who oppose the burning of fossil fuels and who support a sane energy policy. Join us just north of Veterans Bridge – bring your family, bring your friends. Help us get on the right energy course.
